

How to Merge Split Video Files

1. Install [MKVToolNix](#)
2. Create a folder and put the individual video parts inside
3. Run the command for your system:

Windows (PowerShell)

```
$p1=(gci *.PART1.*|select -first 1).Name;$o=$p1-replace'\PART1\.';$t=1;$h=($o-replace'\..+$','')+'.merge_trim_frames';if(Test-Path $h){$t=[int](gc $h)};$x=@('-o',$o,$p1);for($i=2;$i -le 20;$i++){if(Test-Path ($p1-replace'PART1',"PART$i")){if($t-gt0){$x+=('--split','parts-frames:'+ $t+'-')}};$x+=('+'+($p1-replace'PART1',"PART$i"))}};mkvmerge @x
```

Linux / Mac

```
f=$(ls -lv *.PART1.* | head -1); o=${f%PART1./}; t=1; [ -f "${o%.*}.merge_trim_frames" ] && t=$(tr -d '\r\n' < "${o%.*}.merge_trim_frames"); mkvmerge -o "$o" "$f" $(i=2; while [ -f "${f%PART1./}.PART$i." ]; do [ "$t" -gt 0 ] && echo --split parts-frames:$t-; echo +${f%PART1./}.PART$i.; i=$((i+1)); done)
```
